

Cal Poly Amateur Radio Club Part Sales

Room 20-122A 756-2737

STUDENT RUN at LOW COST

Item	Description	Price/Item
7400	2 input NAND gates40
74C00	CMOS NAND gates50
74LS00	2 input LS NAND gates50
74LS10	3 input LS NAND gates55
7473	Dual JK master/slave flip flop50
74191	Binary up/down counter25
TL081	JFET input Op Amp	1.00
LF356	JFET input Op Amp	1.10
LF347	Quad JFET input op amp	2.50
LM301	Op Amp50
LM324	Low power Quad Op Amp	1.25
LM339	Quad comparator	1.25
LM556	Dual 555 timer85
LM741	Op Amp70
CD4016	Quad Bilateral Switch75
CA3086	NPN trans array	1.00
CA3096	NPN/PNP array	2.00
1N4001	50 volts 1 Amp diode20
1N4148	Switching Diodes10
LED	Various color20
2N2222	NPN Trans30
2N4250	PNP Trans15
POTS	Various 15 turn pots	1.50
RESISTORS	various value05
CAPACITOR	various value10 up

Price are subject to change.

CUSTOMER SERVICE FORM

TO RETURN MERCHANDISE OR WHEN WRITING ABOUT THIS ORDER - PLEASE COMPLETE THIS FORM.

IMPORTANT IMPORTANT IMPORTANT IMPORTANT

ALL CLAIMS FOR DEFECTIVE MATERIAL MUST BE MADE WITHIN 60 DAYS OF RECEIPT.
ALL CLAIMS FOR MISSING PARTS MUST BE MADE WITHIN 10 DAYS OF RECEIPT.
ALL CLAIMS FOR DAMAGED MATERIAL MUST BE MADE WITHIN 10 DAYS OF RECEIPT.
PLEASE CALL US FOR INSTRUCTIONS ON DAMAGED MATERIAL.

INSTRUCTIONS

1. All merchandise returned to us must be in the same condition as received by you or no exchange, credit, or refund will be given. Example: No cut or soldered leads.
2. Wrap item(s) securely in either our shipping container or one similar and tape closed.
3. Include this COMPLETED return form in the package, noting the items being returned, the reason for the return and the action you want taken. Attention it to: Customer Service Returns.
4. Return to us via F.C.M. or UPS. Our recommendation is that you insure the package.
5. If you have any questions, please call our customer service department Monday - Friday, 7 a.m. to 5 p.m. at (415) 592-8097.

WE WILL MAKE EVERY EFFORT TO SPEED DELIVERY OF YOUR EXCHANGE OR REFUND/CREDIT. PLEASE REMEMBER THAT IT TAKES TIME FOR US TO RECEIVE YOUR MERCHANDISE AND PROCESS YOUR REQUEST. IF YOU DO NOT HEAR FROM US WITHIN 3 WEEKS FROM THE DATE YOU RETURNED THE MATERIAL, PLEASE CALL US. ALL CLAIMS SHOULD BE PROCESSED WITHIN 3 DAYS OF RECEIPT.

To: dmalone

Subject: Requested Alias

Status: RO

X-Status:

Dear user,

The aliases you have requested have been added to the system alias database. The alias file must be placed in your account under the directory ".aliases" in your home directory. The alias file must have the same name as the alias itself.

The following aliases have been added for this purpose:

w6bhz

All aliases must be performed in your account on the RISC systems. This is particularly true of the ulib accounts which should use site "flute" for their editing.

The format of the alias file is as follows:

LINE 1: address1,
LINE 2 through N-1: addressX,
LINE N: addressN

NOTE: that the second through N lines start with a TAB character and that the first through N-1 lines end with a comma. An example alias file might look like the following:

fsmith@pluto.calpoly.edu,
jdce@furp.zenith.com,
irauser@nike.calpoly.edu,
juser@polyslo.csc.calpoly.edu

Any changes you make to the alias file are effective immediately. The directory and the path to it do not have to be readable by everyone, they may be private. Once you have established the alias, please give it a try. If you have any problems or questions, please mail me.

Now instead of having to type in all those names, or
everyone keeping their own alias, you can just send mail
to "w6bhz@oboe" and everyone will get the mail.
I am the keeper of the list, if anyone wants to be taken
off, or you know of someone else who should be on it,
please e-mail me directly or via w6bhz.

Here is the current list:

Check the file cabinet in the shack. I found a file there during a Poly Royal
 that had rosters from a bunch of years. If you can't find that file, let
 me know. I photocopied everything in that file, and can send you copies.

Cool. Thanks for checking into that. I'm really glad to see that the club ended up with the whole amount rather than the Foundation or ASI taking any for "administrative purposes".

I don't particularly care what the club spent it on (even if it was all on pizza & beer :-)), as long as the club actually got the funds.

If you folks put together a short blurb about what the club is doing, what equipment you currently have, what equipment you'd like to have (that the coke machine won't support), and anything else you think would be of interest, I'll forward it around to some of the alumni. There have to be others around besides myself that are looking for tax writeoffs.

Thanks for adding me to the mailing list!

> Ok, I've forwarded this note on to Craig, our treasurer.

Great, thanks. A couple of years ago I got a call from the folks running the annual alumni fundraising drive. I said "Sure, I'll donate - but I want the funds to go to the radio club." They put me on hold for a while, and came back and said that yes, they could deal with that. Apparently no one in recent history had tried to do that.

I'll have to look up exactly how much it was (I think \$200 or \$250). I never followed up with the club to make sure they got it. I'm doing that now before I consider throwing more down a possible black hole. You folks need it more than the Foundation does.

> I've also moved W6YX up.

Thanks. I'm one of the folks responsible for w6yx.stanford.edu. Feel free to forward any complaints about that system to me. It was down about a month ago when we replaced the PC&F card in the shack, but I hope it's fixed.

problems since then.

> Are you alumni?

Yup. I was the Emergency Coordinator for the club from 1980 to 1984. I'm now the EC for Stanford (it's a long story...) Can you say World Cup zoo?

I hold an annual picnic for any past or present BHZ members on the second Saturday of September in the San Francisco area. It hasn't been widely publicized, but I may actually remind people about it this year.

I would also like to ask you for a copy of Mosaic (I think it is shareware or something).

I know I don't have a Internet connection yet, but I would like to take a look at it.

I think there is a MS Windowz version and an X version. (Will that run on my SUN workstation too?)

Thanks

Dan,

73 and I am glad to see you on the 'net.

I was the Club President in 1988 (I think)

John Flowers N6NRW johnf@scd.hp.com

Others that I have kept up with are:

Bob Stadtherr KI6WO (you know him)
Steve Muther WF6R stevem@berlioz.nsc.com
Darius Mostowfi KE6IL mostowfi@ssr101.slac.stanford.edu
Robin Wood-DeJarnet KD6ITK robin@ibmpa.awdpa.ibm.com
(I am not sure if she changed calls when upgrading)

I cannot confirm the email addresses since I talk on the radio more
than email, but I hope this helps.

Are you planning on putting the alumni on the WWW pages?

Hi there,

My dad is both a Cal Poly Alumnus (of both campuses) and an amateur radio type-person.

His call sign is K6KAA and he's based in Orange County (Tustin).

(He says that that's enough info for you to find him, so that's all I'll say.)

Hope this was helpful.

Field Day is on! We'll be heading up to Hi Mountain on Friday, June 24, for setup. Anyone interested in participating, please contact me either on the air or via e-mail.

We have lots of nice radios for working all the bands (HF, VHF, UHF...), and all modes (CW, Voice, Packet...), and we'll have a 3 computers setup on a network for logging. We are bringing the generator, so we'll have enough power to run all the equipment as well as the fridge and microwave. We are camping so we're not going to bring the kitchen sink.

There is one thing we are lacking for the event. ANTENNAS (antennae?) If anyone knows of any we could borrow, rent, beg (etc.) for, please let me know.

Thanks,
<C6WOT

LOCAL USERS:

Local users are those that log into the bbs via the bbs's telephone modem port (408-749-1950) or via one of the 3 tnc ports (144.93, 223.62, 433.37). Each local user has a bbs account that is used to customize how the bbs interacts with the user.

Local users can set their account up so that all incoming mail addressed to their call will be forwarded via a gateway to internet and on to other networks (mcimail, compuserve, etc). All the user needs to do is enter his email address and turn the feature on.

EMAIL bob@hal.com
EMAIL ON

When the EMAIL feature is turned on the packet message will be deleted at the time of forwarding through the gateway. So care should be taken that the paths are correct prior to turning the feature on, for instance enable it, send a test message, and disable it. After a successful transfer re-enable the feature. To disable the auto forwarding feature simply type:

EMAIL OFF

Messages can be sent by packet users to the internet users via the gateway. This applies to users at NOARY as well as users at other bbs's. Begin by sending a message to IPGATE@NOARY with the first line of the message being the letters "To:" followed by the internet address of the recipient.

N6ZFJ de NOARY >

sp ipgate@noary

Enter your subject:

Meeting?

Enter your message body:

To: bob@hal.com

Are you planning to attend the club meeting on Thursday? Give me
a call. 73, Connie

^Z

NOTE: That the recipient cannot respond to the message unless they are a ham and registered with the gateway. He/she becomes registered by sending a message from his internet host to gateway-request@arasmith.com.

REMOTE USERS:

Remote users are those that do not log into NOARY directly but merely appear from the packet world to use it as home. If a packet user checks the "White Pages" for a remote user the entry comes back as @NOARY. The packet user then address his message to YOURCALL@NOARY and the bbs will do the translation and forwarding to internet.

It is not necessary for a person to know your actual internet address nor use the SP IPGATE method described above. From the packet network it appears that you are just another user at NOARY.

WHITE PAGES:

The "White Pages" is a distributed database of all the bbs users. Most bbs users in the US are represented in the database as well as many from other countries. When a user chooses a home bbs, that bbs generates an update that is sent to the regional servers and then distributed to all the other bbs's. An entry consists of; call, home bbs, first name, zip, city and state. When a user wishes to send another packet user a message he/she consults the white pages (WP) for the home bbs.

REGISTERING:

Before a user, both local and remote, can send a message from internet into the bbs system he/she must register with the gateway. This is done by sending a message from the host that he/she intends to use to gateway-request@arasmith.com with the following information:

CALL:
FIRST NAME:
CITY & ST:
ZIP:

When a request is received the "From" field is copied directly into a file with the requesters call. Whenever the gateway receives a message bound for packet it scans this file comparing on the "From" field. When a match is found the gateway uses the associated call from then on. If there is no match the mailer bounces the message with a one-liner indicating the the user must register.

If you currently use another bbs as home this needs to be stated in the request. Otherwise you will be assigned NOARY as your home. If you choose not to use NOARY as your home you must make sure people know to send your message to YOURCALL@NOARY to pass through the gate. Your WP entry will be wrong.

EXECUTING BBS COMMANDS REMOTELY:

Many of the commands available to local users is also available to remote users by sending a message to the bbs. Here is a subset of the commands currently available.

LIST	: listing messages
LOOKUP	: look up calls in the on-line callbook
WHO call	: dump a users account information
READ	: read messages and files
USERS n	: display the last n users to connect to the bbs
INFO	: display manual pages of various topics
CD	: change directories in the file system
LS/DIR	: display the contents of a directory
WP call	: look a user up in the "White Pages"
HELP	: get help on how to use a command

Not all commands available to local users can be accessed via the gate. All interactive commands are disabled as well as commands that modify the users account.

The command parser for the bbs is very powerful and the user can form very complex requests. For instance the following command is valid on the bbs:

```
LIST LAST 20 BULLETINS FROM NOARY
LIST ALL BULLETINS ABOUT KENWOOD
```

The ABOUT keyword is used to search the subjects of messages for a given pattern, in this case KENWOOD. It can appear anywhere in the subject line.

This is an example of how complex all the commands can become. They can also be abbreviated down to the level understood by most other bbs programs. Any of the following will give the same results.

```
L< N6ZFJ
LIST FROM N6ZFJ
LIS < N6ZFJ
L FR N6ZFJ
```

In most cases a minimum number of unique characters is needed to distinguish a command.

You can get a list of commands and a translation chart from WORLI to NOARY by typing the following commands.

```
INFO COMMANDS
INFO WORLI
```

Other commands that you may wish to execute are:

```
INFO MANUAL
HELP HELP
HELP LIST
```

Now that you know what some of the commands are this is how you go about executing them. You send a message to cmd@bbs.arasmith.com with your commands entered one per line or separated by semicolons. For example if you want to know if three of your buddies are in the white pages and if the bbs has any messages about the ICOM W2A.

Send to:
cmd@bbs.arasmith.com

```
Subject: you can put anything here
wp n0ary n6z fj n6une
list all about w2a
```

The bbs will execute the commands and respond to you via return mail.

SENDING MAIL TO PACKET:

Once registered the user is free to begin using the gateway to send messages from his host through the gateway into the packet world. How much you have to specify of a users address depends on how much the bbs already knows about the user.

If the bbs knows the home bbs of the user and his home bbs is know to the the NOARY bbs, which most of them are, you simply need to supply the call.

n6zjf@bbs.arasmith.com

If the NOARY bbs doesn't know of the user but does know where his home bbs is then you need to supply just the home bbs call in addition to the users.

n6zjf%n6qmy@bbs.arasmith.com

Notice that the call and home bbs are separated by a percent sign '%' rather than the '@' which is used in the packet domain. This is because the '@' has a meaning in the internet address.

If the bbs has no knowledge of either the user or his home bbs then you probably have the wrong home bbs or it is a new bbs. In which case you will have to supply the full address so the bbs will know how to route the message.

n6zjf%n6qmy.#nocal.ca.usa.na@bbs.arasmith.com

This level of addressing is hardly ever needed and normally means that the home bbs is in error.

Bulletins can be sent in a similar fashion. The address is made up of a keyword, which can be any six character word and a distribution. Distributions are local to an area. For instance SBAY is valid in northern CA, it probably has no meaning at all in Topeka, KS.

Valid distributions are:

ALLUS	please avoid this one
ALLUSW	all western US
ALLCA	all California, any 2 letter state should work

So if you trying to find a cw filter for a Kenwood TS440.

Send to:

want%allca@bbs.arasmith.com

Subject: Kenwood TS440, CW filter

If you have one of these you are willing to part with please give me a call or leave message, thanks.

73, N6ZFJ@NOARY.#NOCAL.CA.USA.NA

Be descriptive, brief, and always include your full return address in the message. Also please try to limit your distributions to small regions. Using the ALLUS distribution really slows down the flow of messages.

INFO ON THE NOARY BBS:

The bbs came into being in July of 1990 and as of July of 1992 had over 600 users, 500 registered as home. The bbs has 3 rf ports, 2 phone ports, the internet port, and a voice synthesizer port. The latter allows users to check for messages via DTMF from their handhelds.

The bbs itself runs on a Sun workstation under Unix. The code was written by Bob Arasmith to focus on the user. Great care was taken to make the bbs very forgiving to the novice user but very flexible and powerful for the old-timer. The bbs can be configured to interact with each user differently. Some examples are:

- * List messages in either descending or ascending order.
- * Specify a list of keywords that the user wishes not to see displayed when a list is performed, similar to a kill file.
- * .signature and .vacation files.
- * Specify how many lines the users terminal is capable of displaying before scrolling, the bbs will feed info this many lines and pause allowing the user to catch up and continue or abort the operation. Similar to more.
- * Users can put commonly executed commands in keystroke macros that are accessible via a single keystroke.

A manual is currently available describing the commands and their permutations. This manual will be available in late 1992 as a postscript file. Run the command INFO MANUAL to learn how to get one via the post office. It is not available in an ascii format.

If you have any questions about the internet gateway or the bbs in general please drop me a message.

73, bob

Hi, got a message from WF6R regarding alumni info you are collecting.
Here's what I've been up to:

Name: Darius F. Mostowfi
Call: KE6IL
Employer: Stanford Synchrotron Radiation Laboratory
Phone: (415)926-2577 (direct)
Other: Really busy! Working on MSEE at Stanford in Signal Processing
(part time). Building repeater controllers (see QST/73 Spectrum Electronic
Products ad).

Please ad me to any mailing list for info on events, etc..

73!

Darius

Ok, this list is starting to get a lot longer, so I'll need to keep more info on each of you. (Not just e-mail address) I know I had all this info at one time, I think it's somewhere here on my desk...

Please check the list below and check your name, call, and e-mail address. This is the current W6BHZ e-mailing list (w6bhz@oboe.aix.calpoly.edu).

Please reply only if you have a change or an addition.

Thanks,

Stay tuned for time/freq to contact W6BHZ on Field Day
(Look at our Field Day WWW Page: <http://www.calpoly.edu/~dmalone/w6bhz>)

Dan,

You have the correct call sign and yes I am Cal Poly Alumni residing in
SLO City for the last 23 years. I also a Battalion Chief with the City
of SLO Fire Department (Cal Poly's New Fire Department). I'm a fairly
new ham trained by the Poly ARC. I look forward to meeting you at one of
the clubs future functions.

I'd like to say welcome to all the new members of the W6BHZ e-mailing list. There are about 45 people now on this list, including 21 alumni! This interest has started a quest for W6BHZ alumni, and about 320 names have been compiled so far!

Please send responses to this mailing to:
w6bhz-request@oboe.aix.calpoly.edu

W6BHZ on the World Wide Web

The W6BHZ World Wide Web Home Page is growing in popularity as well. Since May 1st, the W6BHZ home page was the 9th most requested document on the Cal Poly WWW server! A combined total of 2216 requests have been processed for all of the W6BHZ documents. Take a look at the original request for club recognition submitted in 1947. It's been electronically preserved for all to see on the WWW. I'd like to encourage everyone to submit pointers for inclusion on the page. Also, submit our pointer to your local WWW servers and anywhere else that may get us exposure. Let's make W6BHZ known! I've been averaging about 2 new alumni per week that are responding to the WWW page. Here's our URL:

<http://www.calpoly.edu/~dmalone/w6bhz>

FIELD DAY 1994: (This information can also be found on the WWW)

We will be heading up to the fire lookout tower on Hi Mountain again this year. Hi Mountain is located in the Los Padres National Forest, near San Luis Obispo, California.

This is almost exactly where we will be:

Longitude: 120 Degrees 25 Minutes North
Latitude: 35 Degrees 15 Minutes West
Altitude: 3180 Feet

We will be running 2 Alpha in Santa Barbara.

Everyone is welcome to come and visit. Talk in will be on 444.525+ (pl127.3) or 146.52 (simplex). If we don't respond, send a DTMF "123" on 146.52 to get our attention. There is a gate we will have to come down and open for you.

(All times Pacific Daylight Time)

12:00pm 4:00pm 8:00pm 12:00am 4:00am 8:00am

Listen for us on 146.52 as well, we will be line of sight to most of the hills in the bay area as well as Fresno area. We will be running packet on 145.03. Possibly ATV on 443.00 or 439.25, so you can watch for us too!

The photo of the tower was the one used on the club's QSL card in the early 80's. I believe Dee Hester, N6BQR took it, but you can confirm that by checking the small print on the QSL card.

The bubble was originally installed on the Thursday (?) before the 1980 Poly Royal. I had originally planned on taking it down after that event, but we all decided that that was really the best place for it so it stayed. The club bought it from me later.
